

The

**German Institute of Human Nutrition (DIfE)
Potsdam-Rehbruecke**

is an independent foundation and member of the Leibniz Association, an alliance of scientific institutions. The mission of the institute is to conduct experimental and clinical research in the field of nutrition and health.

The **Department of Molecular Epidemiology** invites applications for a position as

Epidemiologist

The position is available as soon as possible.

Tasks:

- Design, conduct, analysis and interpretation of epidemiologic investigations in the EPIC study related to diabetes
- Coordination of biochemical and genetic measurements
- Organization of follow-up assessment

Skills:

- Study of Medicine / Natural Sciences and a PhD or equivalent
- Study of Public Health / Epidemiology
- Knowledge of statistical software packages (SAS)
- Ability to work in a team, independence and the willingness for interdisciplinary scientific working

The position is available immediately, for 3 years with the option to be extended. The position provides excellent opportunities to start a career as epidemiologist and establish a field of expertise within international collaborations. A postdoctoral lecture qualification will be supported. The pay scale grouping will be defined depending on agreed preconditions, already acquired qualifications and existing work experience (remuneration group 13/14, TV-L).

Applications with appropriate documents (including a publication list) should be sent to:

**German Institute of Human Nutrition Potsdam-Rehbruecke
Personnel Department
Arthur-Scheunert-Allee 114 - 116
D-14558 Nuthetal
Germany**
